

EnCorps

Case
Study:

2024-2025 School Year

encorps.org

SUMMARY

Through the LAUSD CTE partnership, EnCorps supported thousands of students and teachers in building practical, career-ready skills while fostering creativity, confidence, and a deep sense of belonging in the classroom for students and teachers alike.

This program supported 24 first and second year CTE teachers across 21 different schools in Los Angeles using a mentor/mentee format. EnCorps provided pedagogical training and support throughout the school year and matched new teachers with a veteran teacher at their school for monthly check-ins, observations, and feedback. In total, this cohort served over 3,000 students participating in CTE courses such as Software and System Development, Fashion and Interior Design, and Health Science.

TEACHER IMPACT

95%

built meaningful
relationships at their
school site

90%

report improved
confidence and
pedagogical skills

of mentor teachers
and **88%** of mentees
gained concrete
strategies they now
use in their
classrooms.

86%

feel part of a
supportive, professional
community

21 CTE teachers (13 mentors, 8 mentees) participated in our educator survey

What Teachers Are Saying

Teachers praised the program's reflective structure, collaborative environment, and real-time support. They recommended continued improvement in onboarding, communication, and CTE subject-specific training to further strengthen impact.

"Collaborating with my mentor supported my professional development by giving me a reliable source of feedback, encouragement, and practical strategies tailored to my classroom needs."

- Mentee teacher, LAUSD, 2024-2025

"The in person collaborative support trainings were helpful because the facilitators were able to clearly layout the expectations for mentors and mentees and ask for deliverables. As a mentor this helped me facilitate the conversation in a more structured manner, and I was able to ask for support, if needed."

- Mentor teacher, LAUSD, 2024-2025

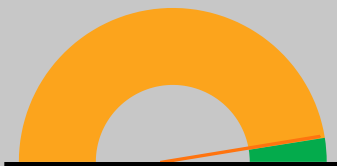

Student Impact

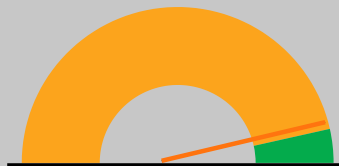

92%

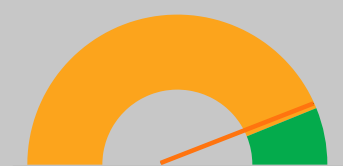

students believe they are
gaining skills necessary
for future success

95% of students connect
coursework to career
readiness

93% say class materials
and equipment help
them learn industry
relevant skills

87.7% Feel represented
in their CTE field

"One of my favorite memories was bringing my idea to
life with my own hands. It felt amazing to see my
creativity turn into something real."

- CTE Student, LAUSD, 2024-2025

285 students shared their experience through our year-end survey, revealing powerful outcomes
